

Project CY 8609

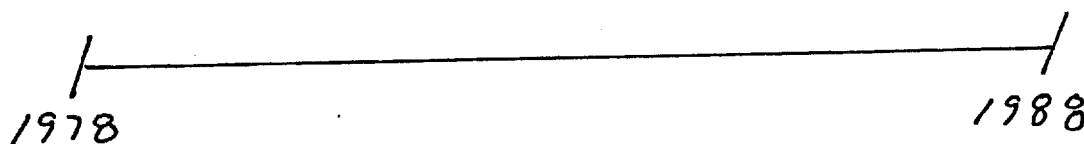

Task

1. Describe the Technical Facility located Vic:

SG1A

2. Within the following ten year period determine if and when any "special events" occur:

* Note: If you do find any "special events" - - - subsequent sessions will be focused on each separate "special event."

 Affirmant involved w/ projects above. 3-5 times as
 tall as a person. Very complex - tubes, pipes, cable
 heat, flux, meters, dials, fail safe, redundant
 circuits, steady operation, not fluctuating as it fluctuates
 would be disadvantageous to purposes. Human bus 2
 sound steady. Person monitor/controller. Watches
 dial and makes adjustments in response to order
 from elsewhere in bldg. "Basement" not seen to be
 under part A at least; instruments passenger

By way of Analogy - if this were a submarine, it would have all its hatches closed & locked, periscope retracted, and dead in the water on the bottom while all kinds of activity takes place. During attacks, its like site is "hermetically sealed" to prevent any inking, getting out to outsiders as to a battle taking place.
